

FUEL CREATIVITY. REDEFINE PLAY.

With SurfaceMax Safety Surfaces

DISCOVER THE POSSIBILITIES

From dynamic playgrounds and recreation areas to high-performance fitness zones, SurfaceMax surface solutions set the standard for quality, durability, and forward-thinking design. We deliver more than just innovative surfacing, we transform environments.

To ensure playground safety, the International Play Equipment Manufacturers Association (IPEMA) offers a Third Party Certification program. Through this program, TÜV SÜD America Inc. (TÜV), an independent testing laboratory, verifies a surfacing manufacturer's compliance with ASTM F1292, the Standard Specification for Impact Attenuation. SurfaceMax meets these rigorous standards, delivering trusted protection for play environments.

SurfaceMax Poured Rubber, Synthetic Turf, and Loose Fill Systems have been tested and meet ASTM F1292 Standards for compliance.

SurfaceMax Loose Fill Systems have been tested and meet ASTM F3012 Standards for compliance.

SurfaceMax Engineered Wood Fiber Systems have been tested and meet ASTM F2075 Standards for compliance.

The International Play Equipment Manufacturers Association (IPEMA) provides a third-party certification to ensure product compliance to specific ASTM and/or CSA standards. Each product promoted here, if certified by IPEMA, includes the name and model number for you to search the IPEMA website for verification. To verify product certification, visit www.ipema.org and conduct a search

TRUSTED SAFETY

SurfaceMax safety surfaces prioritize the well-being of all users. Our surfaces are designed to provide fall attenuation and help ensure a safer environment for play and recreation.

CUSTOM SOLUTIONS

At SurfaceMax, we understand that every space is unique. With a variety of surfacing choices, we provide customized solutions to meet your specific needs.

TOTAL RELIABILITY

Choosing SurfaceMax means a seamless experience from concept to completion. Enjoy the benefits of a safer, more creative space, backed by our expertise.

BOLD CREATIVITY

Our surfaces do more than protect—they inspire creativity. With a diverse range of colors and design options, SurfaceMax transforms ordinary spaces into imaginative playgrounds.

PROVEN DURABILITY

Our safety surfacing is built with durable materials that maintain integrity even in high-traffic areas. SurfaceMax surfaces remain vibrant and intact, season after season.

POURED-IN-PLACE RUBBER

Experience safety and design versatility with SurfaceMax Poured-in-Place Rubber and Recycled Bonded Rubber Surfacing. These innovative solutions revolutionize playgrounds and recreational spaces, offering an unmatched combination of protection, creativity, and durability. Our poured rubber surfacing not only absorbs impact to create a safer environment but also unlocks endless design possibilities.

SEAMLESS ADAPTABILITY

Our poured-in-place rubber can be shaped to fit various layouts, ensuring a consistent and cushioned surface tailored to your space.

LONGEVITY & LOW MAINTENANCE

Designed for heavy use and changing weather conditions, our surfacing remains vibrant and durable for years with minimal upkeep.

Accessible and inclusive, poured-in-place rubber creates a seamless surface, making it easier for individuals using mobility devices to navigate play areas.

SYNTHETIC TURF SURFACING

Enjoy the ideal blend of nature and innovation with synthetic turf—capturing the look of real grass while meeting safety standards, all without the maintenance of natural turf.

YEAR-ROUND GREENERY

Say goodbye to the hassle of maintaining natural grass. SurfaceMax Synthetic Turf stays lush and green all year long—no watering, mowing, or fertilizing required.

SOFTNESS & SAFETY

Designed for comfort and impact absorption, our synthetic turf provides a cushioned surface that helps minimize injury risks during play and activities.

DESIGN FREEDOM

Customize your space with intricate patterns, logos, and unique designs, creating a welcoming and engaging environment.

RUBBER INTERLOCKING TILES

Rubber tiles provide a durable and safer solution for recreational surfaces. Made in the USA from recycled rubber tires, this surfacing system offers unique benefits. Our patented interlocking design ensures secure installation, making SurfaceMax Tiles a smart choice for a resilient surface.

SHOCK ABSORBENT FOR ENHANCED SAFETY

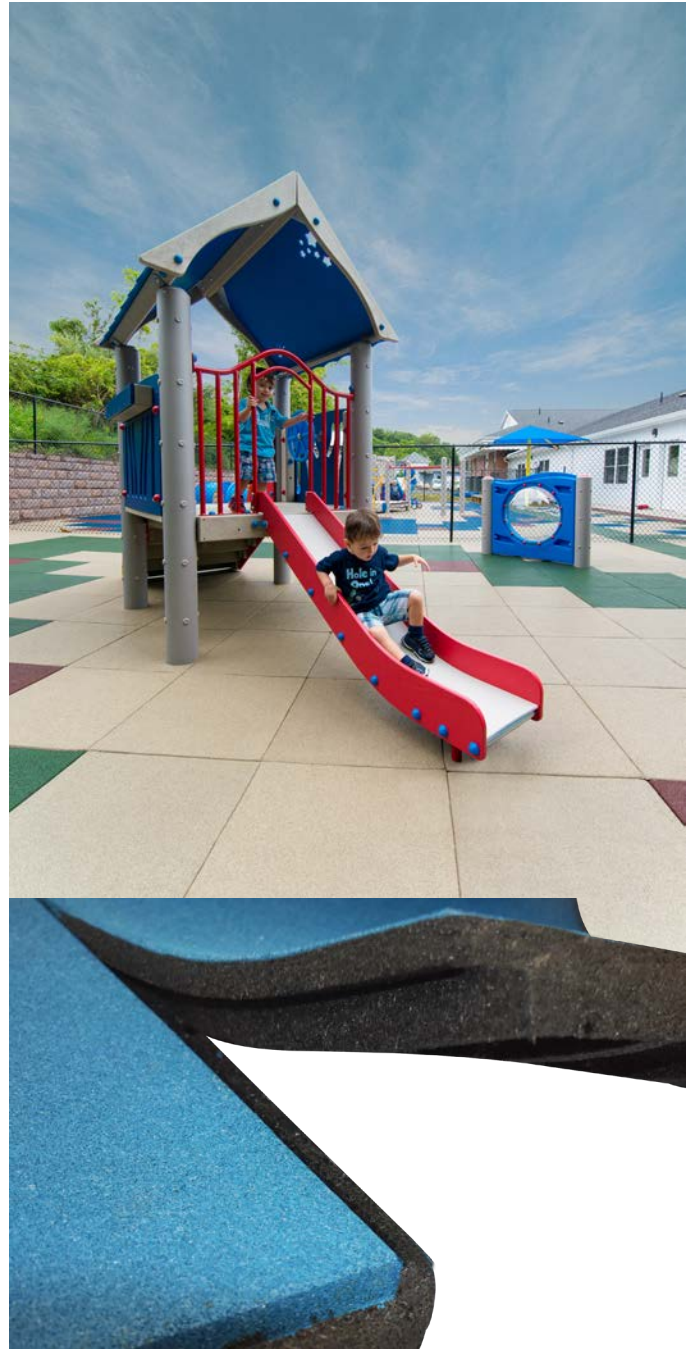

Perfect for playgrounds and sports facilities, these tiles help reduce the risk of injuries.

SMOOTH, PATENTED INSTALLATION FOR CONVENIENCE

Designed for easier installation, our tiles simplify the process for both professionals and DIY enthusiasts.

WEATHER RESISTANCE AND UV STABILITY

Built to withstand the elements, SurfaceMax tiles resist weathering, UV rays, and environmental wear, requiring minimal maintenance.

LOOSE FILL SURFACES

Our loose fill surfacing solutions—including engineered wood fiber, recycled loose-fill rubber nuggets, and shredded rubber—provide versatile safety for playgrounds and recreational spaces.

NATURAL IMPACT ABSORPTION

Loose fill surfaces help create soft, cushioned surfaces that minimize the risk of fall-related injuries.

SUSTAINABLE SOLUTIONS

Our use of recycled rubber materials supports environmental responsibility and sustainable practices.

COST-EFFECTIVE INSTALLATION

Loose fill surfacing can be installed by volunteers, saving on installation costs while still providing a safer play area.

WEAR MATS

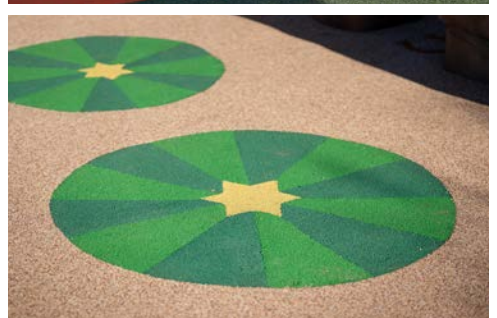

Protect your playground with our durable rubber wear mats. Made from recycled materials in the USA, these ground covers help prevent early erosion under high use zones like swing bays and slide endings. Engineered for longevity and slip resistance, SurfaceMax mats will help shield against heavy traffic and environmental factors that can cause surfaces to become non-compliant.

EXPANDING BEYOND THE PLAYGROUND

SurfaceMax extends its expertise to recreational safety surfacing for aquatic areas, community trails, and sports courts. Whether you're designing a vibrant water play zone, revitalizing public trails, or upgrading athletic courts, SurfaceMax delivers innovative solutions tailored for durability, safety, and aesthetic appeal.

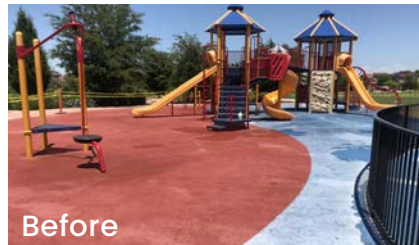

PLAYFUL DESIGNS

When designing recreational spaces, safety, accessibility, and durability are key. Surfacing today is more than just a safety feature—it can also encourage interactive play and engagement. Bright colors, patterns, and integrated games like hopscotch or mazes enhance the play experience and attract families.

MAINTENANCE OPTIONS TO PROTECT YOUR INVESTMENT

SurfaceMax ensures long-lasting durability, with surfaces engineered to withstand dynamic play. Routine maintenance—such as cleaning dirt and debris—helps preserve color and slip resistance. Periodic inspections and prompt repairs for minor wear and tear, like cracks or fading, will extend the lifespan of your surface. Maintain your loose fill surface depth with regular top-offs to stay compliant and help preserve the surface life. Our expert team is always available to assist with repairs and maintenance, ensuring your investment remains safe and vibrant for years to come.

Strong Foundations®: Planning, Purchasing, and Protecting Play and Recreational Surfacing is a valuable resource designed to guide you in selecting the right surfacing for your playgrounds and recreational areas. This resource helps you maximize play value and ensure lasting performance.

Our commitment to customer satisfaction extends beyond installation, offering peace of mind to clients that their investment in surfacing will remain a reliable and attractive feature for years to come.

SurfaceMax installs surfaces for people of all abilities.
