Deck Height + Size

Looking for a recreation solution for a local park, school, or early childhood center? Choose from a variety of products that include traditional composite structures with two different deck sizes, or from deckless systems that encourage continuous lateral movement.

Age Range

SuperMax and DuraMax systems are designed for children 2-5 years or 5-12 years old, while totmax and early horizons are created for children ages 2-5 years. Boulderscapes, Horizons, and Skyline systems provide more physically challenging play that is appropriate for children 5-12 years.
